DETAILED ACTION

1. Claims 1 and 2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kaminski in view of Miller and Syverson.

It would have been obvious that driven drum 4 with knurled surface 10 (see column 6 lines 33-37) of Kaminski could house a drive as taught by drum 11 of Miller. The design of the drive could be as taught by Miller, with a rack fixed to the rotating drum and a motor fixed to the stationary shaft, or as taught by Syverson, with a field magnet 64 fixed to the rotating drum and an armature 40 mounted on the fixed shaft. Therefore, the design of the drive for the drum is considered to be functionally equivalent to those in the prior art.

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the armature and field magnet of claim 1 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

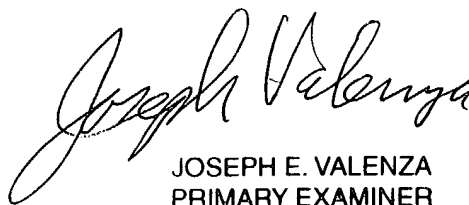

3. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not

Art Unit: 3651

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
